3.0 DESCRIPTION OF WORK

QIA is seeking external services to manage and implement the procurement process for equipment and materials that are required for the successful operation of its regional Nauttiguqtiit guardian program. QIA's regional Nauttiguqtiit program operates a guardian program in all 13 Qikiqtani communities. Each community's program is in a different stage of development and therefore has

PROPOSAL NAME: QIA Nauttisuqtiit Skidoo and ATV purchase

different needs for equipment. The Nauttisuqtiit program started in Arctic Bay in 2020 with 5 communities and each year additional communities have been included in the program.

The guardians program focuses on harvesting and food security in communities, research and monitoring, community outreach, search and rescue and knowledge sharing. Ensuring that guardians have the appropriate equipment to conduct their work is essential; skidoos, ATVs and side by sides are critical to conducting safe and successful programs in the arctic. Getting this equipment to communities requires planning, logistics and project management to ensure that the equipment and materials are purchased and ready for the tight sealift schedule in the arctic.

The successful proponent will be required to coordinate the purchase of the specific equipment required for each Nauttisuqtiit program in the Qikiqtani region. The purchase of skidoos and ATV's will have to be completed in a timely manner to allow for the equipment to be included in the annual sealift to each community. Sealift reservations have already been completed and are not included in this RFP. This RFP include the purchase and delivery of the following equipment:

LOGISTICS & PROJECT MANAGEMENT

The proponent will also need to provide a storage or laydown area to store the equipment and materials as well as provide services to package and prepare the equipment and materials for delivery to the sealift port.
